Side-by-Side Figures Using Subfigure (Deprecated)

Koyena Brahma

September 23, 2024

1 Introduction

This document demonstrates how to include side-by-side figures using the `subfigure` package in LaTeX.

2 Side-by-Side Figures

Here, we present two figures placed side by side using the `subfigure` package.

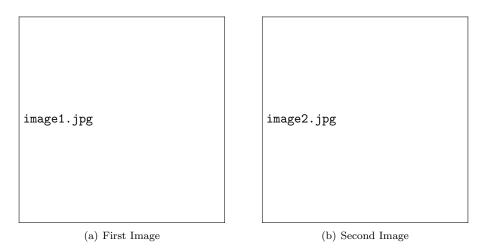

(a) First Image

(b) Second Image

Figure 1: Two images side by side using subfigure

3 Conclusion

In this example, we successfully placed two images side by side using the deprecated `subfigure` package.
